

Design Sprint Day 1

Individual Contributions:

- Patrick Bardsley
 - **User scenario:** Clarence is a 43 year old man who unfortunately got fired from his job at McDonald's. He needs to find a platform that helps him search for a new job similar to his old one, so that he can get back to work and be employed.
 - **User story:** As a computer science junior nearing the end of my time here at Charlotte, I need to find a job site that not only looks for full time jobs, but also looks for paid internships, as I need to have experience prior to entering the field.
 - Features:
 - Is able to filter what kind of job I am looking for (Internships, full-time, co-ops, etc)
 - Able to upload my resume and list my skills
 - Able to enter in a short description of me for employers
 - Able to privately message a recruiter with end-to-end encryption
- Logan Hasty
 - User scenario: Jorden is a student who is set to graduate at the end of this semester. He needs to find a platform that helps him search and apply to roles matching his skill set, to reach his ultimate goal of gaining full-time employment within six months of graduation.
 - User story: As a computer science major nearing graduation, I need to find a product that will help me search and apply for software engineering roles so that I can gain employment within six months of graduation.
 - Features:
 - Filter jobs based on skill set (swipe feature similar to TinderTM)
 - Upload resumé for discovery by employers
 - DM networking feature similar to LinkedInTM
- Ryan King
 - **User Scenario:** Claire is a junior in the college of business with minimum work experience in the field from a previous internship in highschool. She is looking for a summer internship to get ahead of her peers but isn't well connected enough to get a recommendation from inside those big companies.
 - **User Story:** As a business student with few connections, I need a job site that will help me connect to business leaders and other professionals fast in order to give myself a head start in the business world.
 - **Features:**
 - Upload resume and list skills
 - Connect with employers through a direct message system
 - See/swipe through lots of potential employers quickly
 - Filter employers by my interest in business and economics
 - **User Scenario:** Garth, 18, freshmen majoring in game design. Needs internship experience on a flexible schedule in the fall. Prefers working from home.
 - **User Story:** As a game design major with a preference for working at home, and on the lookout for an internship, I need to find businesses that will employ remote and have more flexible part-time student hours.
 - **Features:**
 - Ability to filter by points other than just interest, like hours or remote work
 -
- David Kravchuk

- **User Scenario:** Thomas is a senior at the University of North Carolina Charlotte and is majoring in computer science with a concentration in cybersecurity. He is looking to get his foot in the door with an internship at any company that focuses on information security. He has no prior work experience and would also like to develop networking skills with the people who are more experienced in this field.
- **User Story:** I need a platform that I can quickly apply for job positions in my area or continuously look for better opportunities posted by employers. I also need a way to better connect with people in my field so that I am always aware of the latest news and information useful in my line of work.
- **Features:**
 - Automated schedule times to meet with employers
 - Automatically send out my resume if I swipe right on a job
 - Tailor my job search based on swipes and filter options
 - Chat system to talk with employers
- Daniel Monserrate
 - **User Scenario:** Drew is a Senior in Computer Science with a concentration in Cyber Security. He has also chosen to minor in Economics. After graduation, Drew is looking for a job or internship to jumpstart his career but is having a hard time finding a platform where he can find jobs that fit him.
 - **User Story:** Being this close to graduation without a job secured is scary. I want to start working in my field and avoid going back to living with my parents at all costs. I desperately need to find a way I can find and apply to jobs that interest me and fit my major.
 - **Features:**
 - Be able to message the recruitment team for a company directly.
 - Display desired requirements for the position being offered.
 - A way to narrow down and filter the results shown by matching the users to jobs that correspond with their major and location.
 - Upload resume to profile so all the user has to do is swipe right and hit the apply button.
 - Preferences option on profile so the user has the ability to match up with jobs that interest them.
- Jason O'Connor
 - **User Scenario:** Justin, 37, Born in Michigan and recent transplant to North Carolina. He has very few networking connections. Graduating Spring 2022, he is looking for full time work and a change in career fields.
 - **User Story:** I'm looking for a platform that will help me target entry level positions in a computer science field and explore local companies that I might otherwise have no method of learning about. Many of the other platforms often require me to rewrite my resume, and with 20 years of experience that becomes a very cumbersome task.
 - **Features:**
 - Quickly, easily and simply view the job title, description, salary and requirements of open job listings.
 - Easily apply to these positions utilizing existing resume and profile information, without the need to retype everything.
 - View and track my activity within the application and have the ability to easily follow up on submitted applications.
- Sarnam Patel

- **User Scenario:** Sam is a junior in Computer Science and is concentrating in Software Engineering. As he is an international student, he needs a platform to look for summer full time or fall part time internship opportunities that match his skill set and where he can learn and grow as an individual.
- **User Story:** As a computer science junior, I need to find an application that will help me to apply for Full Stack Developer internship roles so that I can gain experience in the job area that I am interested in.
- **Features:**
 - Filter option: to narrow down the search.
 - Direct message to employers/HR: to communicate directly with the HR.
 - Resume: to attach it with all of my applications.
- Timothy Pelphrey
 - **User Scenario:** Justin is a freshman in computer science concentrating in Web Development. As he has just moved to a new area, he needs an app to help him look for an internship for the summer to gain experience for future jobs that will match his skill set.
 - **User Story:** As a computer science freshman, I need an app that will help me find internship opportunities that way I can gain experience in developing Web applications to better my skill set.
 - **Features:**
 - Message the recruitment team for the desired company
 - Upload resume to the company
 - Check requirements for Job listing
 - Set desired preference in users profile to display jobs that interest them

Group Contribution:
